

Tadpoles

By

Matt James

Matt James gives us lots of interesting scientific information in this book, see if you can fill in the missing words in the following sentences:

1. In springtime, huge clouds bring _____. These clouds are called _____ clouds. There are many different kinds of _____.
2. _____ like the rain. It makes them _____. When a group of frogs sing together it is called a _____.
3. Puddles form in the field and they grow and grow until they become one _____ puddle. Then the field isn't a _____ anymore. My dad says that puddles like these are called _____ ponds. That means that they won't last for very _____.
4. Frogs eggs are called _____. A single frog can lay _____ of eggs at a time. When the eggs hatch, _____ are born. Tadpoles start out as little black _____, and then they will grow gills and _____, starting with the _____ ones. When tadpoles grow legs, they are called _____.
