

IsThisAnOlogy

By Amanda Bulman and Ruth Lawrence

Pick an "ology" that was not explored in the book (e.g. zoology, biology, ecology, etc.) Research what it is, what a person that studies it does, an interesting fact about the ology, and how to become an 'ologist' in it.

Ology chosen: _____

What is the ology you chose to research?

What do people that study it do?

What is an interesting fact about the ology you chose?

How does someone become an 'ologist' in it?-

Any other interesting information to add:
