

Always Beginning: The Big Bang, the Universe, and You Puzzle

Down:

1. any of a class of warm-blooded animals that feed their young with milk and have hair
3. a ball-shaped gaseous celestial body (as the sun) of great mass that shines by its own light
5. a large group of living things that is not a plant that can move around by themselves to find food.
7. the solid part of the surface of the earth
8. a liquid that can be rain from clouds, forms bodies of water like lakes and is odorless and tasteless

Across:

2. a cold-blooded animal with a typically scaly body and fins that lives and breathes in water
4. one of the very large groups of stars and other matter that are found throughout the universe
6. a heavenly body other than a comet, asteroid, or satellite that travels in orbit around the sun
9. the galaxy of which the sun and the solar system are a part of
10. a group of cold-blooded air-breathing that usually lay eggs and have skin covered with scales
