

## Barefoot Skateboarders STEAM Activity 2

Watch the [Popular Mechanics Video](#) which features Mike Vallely showing some of the steps to build a Skateboard.

After watching the Popular Mechanics video How Skateboards are Made, and discussing it with a friend, challenge yourself to create a 'model' of a skateboard using found objects. Check your recycling bin, and objects that you could 'borrow' from your classroom or home to create the model. Draw a plan and be creative!
